Jerusalem, by C. Schick. Presented by Dr. A. Petermann. A map of Greece and the Grecian Archipelago. Presented by Dr. A. Petermann. Admiralty Charts, 8 in number. Ordnance Sheets, 94 in number.

The Paper of the evening was the following:—

DESPATCHES and LETTERS relating to the last Journey and reported Death of DR. LIVINGSTONE. By DR. G. E. SEWARD, Acting-Consul, and DR. J. KIRK, Vice-Consul at Zanzibar.

*1. Despatches from DR. SEWARD, H.M. Acting Political Resident at Zanzibar, to Lord Stanley, Secretary of State for Foreign Affairs.*

(Communicated by the FOREIGN OFFICE.)

“MY LORD, “Zanzibar, December 10, 1866.

“I send you the saddest news. Dr. Livingstone, in his despatch from Ngomano, informed your Lordship that he stood ‘on the threshold of the unexplored.’\* Yet, as if that which should betide him had already thrown its shadow, he added, ‘it is best to say little of the future.’

“My Lord, if the report of some fugitives from his party be true, this brave and good man has ‘crossed the threshold of the unexplored,’ he has confronted the future, and will never return.

“He was slain, so it is alleged, during a sudden and unprovoked encounter with those very Zulus of whom he says, in his despatch, that they had laid waste the country round about him, and had ‘swept away the food from above and in the ground.’ With an escort reduced to twenty by desertion, death, and dismissals, he had traversed, as I believe, that *terra incognita* between the confluence of the Loende and Rovuma rivers at Ngomano, and the eastern or north-eastern littoral of Lake Nyassa; had crossed the lake at some point, as yet unascertained; had reached a station named Kompoonda, or Mapoonda, on its western—probably its north-western—shores; and was pushing west or north-west into dangerous ground, when between Marenga and Maklisoora a band of implacable savages stopped the way, a mixed horde of Zulus, or Mafite, and Nyassa folk.

“The Nyassa folk were armed with bow and arrow, the Zulus

---

\* “The dim outline of highlands appears even at this distance. They raise the spirits, but possibly this is caused partly by the fact that this is about 30 miles beyond our former turning-point and the threshold of the unexplored. I propose to make this, *i.e.*, Ngomano, my head-quarters till I have felt my way round Lake Nyassa. If prospects are fair there I need not return, but trust to another quarter for fresh supplies, but it is best to say little of the future.”—See ‘Proceedings Royal Geographical Society,’ vol. xi. p. 15.
